REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The surfactant represented by formula (1) in claim 1 will be treated as a hydrocarbon surfactant. The closest prior art of record, Tang (US 6,512,063) teaches a process for preparing a fluoropolymer with a linear hydrocarbon sulfonate surfactant. However, Tang does not teach or suggest a surfactant wherein the carbon attached to the anionic group is a secondary or tertiary carbon. Bekele et al. (US 2003/0068346) teaches a secondary alkane sulfonates in cosmetic compositions. There will no reasonable expectation that sulfonates taught by Bekele et al. would be efficient in a polymerization process for fluorinated monomers (see Applicants' arguments P5-6 filed on 01/05/2009). Additionally, a showing of unexpected results demonstrably show improvement in the polymerization process of fluorinated monomers (see Applicants' assertion on P7 filed on 01/05/2009). Therefore, claim 1 is deemed nonobvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
